VOLANT NYLON

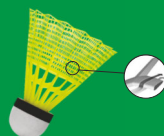

Recovery Time
When smashed, a JET shuttlecock recovers in only **0.02** second. This performance is just **0.005** seconds slower than a feather shuttlecock

Flight Pattern
Developed using the flight timing of feather shuttlecock, JET Nylon Shuttlecock are precisely designed and manufactured to provide accurate flight performance.

Wing RIB
The **WING RIB** design utilizes air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.
