# **Aasthaa Industries**

## History

The result of a great research of style and beauty, delivered to the creation of the new life style brand. Aasthaa Industries fuses its four generation experience of craftsmanship with the well known designer's taste, elegance and visions to bring to life a new concept brand.

---

Each item was carefully designed and realized with the most amazing technologies using the very top quality materials. Everything is son of a long research. We constantly develop new concepts but always with the same criteria: Our collection is a mix of contemporary designs which all have its own place in the history. We do respect the Styles. Our philosophy can be described as classic and timeless, adapted for the needs of the modern sophisticate living. A vast catalogue of objects, furnishings, lighting and art work, are all produced to the highest standards in our small workshops world wide, which follow the centuries old tradition of handcraft manufacturing.
